

## Some Tips from the School Nurse

Dear Parents/Guardians:

Please join in an effort to help us continue to keep Columbus Elementary School a healthy and happy environment for our faculty and students.

We have wonderful custodial staff members working everyday to keep the school as clean as possible and proper hygiene is always encouraged.

While we do the best we can on our part, we are asking for your help. The following are a few guidelines for your information:

- If your child is showing signs of an illness, it is important to keep them home from school.
- Should your child show any of the following symptoms: congestion, fever, vomiting, continuous cough, they are NOT to come into school.
- Please follow the 24-hour rule: if your child has a fever, he or she must be 24 hours fever-free before returning to school; if the student is vomiting or is sent home from school due to vomiting, please keep them home for 24 hours as well.

Children learn best when they're feeling their best! Let's keep Columbus School a fun, healthy, and productive place of learning!

Sincerely,

Ms. Lisa Cangialosi RN, BSN

Columbus School Nurse
